

ABSTRACT OF THE DISCLOSURE

Stretch films which exhibit good puncture and impact resistance while also exhibiting resistance to defect propagation are
5 desired. The films of the present invention have an ultimate stretch of
at least 200 percent , a dart impact strength of at least about 700
gms/mil and a catastrophic failure stretch of at least 95 percent of the
elongation to break value (CF of 5 or less). The films preferably
10 comprise at least 3 layers and preferably comprise at least 50 percent by
weight of polyethylene polymers.
